

General Public Briefing Session 2

21 March 2024

Working together for a brighter energy future.

Hello and welcome

PoweringWA Implementation Team

Wenona Hadingham

Director

Brooke Eddington
Assistant Director

Gina loffee

Assistant Director

Supported by the growing PoweringWA team, Western Power and Treasury team members

Agenda

1. PoweringWA recap and update

2. Community engagement and shared benefits

3. Other updates

4. Next Steps

PoweringWA recap and update

Objectives

Decarbonisation

Net zero by 2050

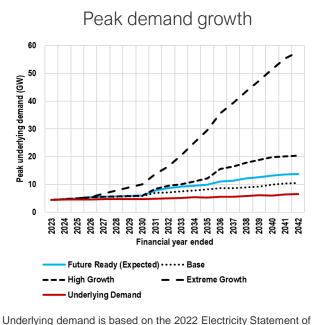

Meet company decarb targets and safeguard mechanism obligations

WA Government emission reduction by 2030

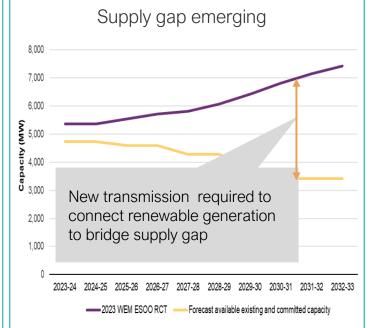

Industry Growth

Opportunities (ESOO) Expected Scenario, projected beyond the

10 year horizon.

Power Reliability

Communities

Economic benefits for impacted communities

Supporting communities throughout the renewable energy project lifecycle

Ensuring communities feel heard

PoweringWA Principles

- Reflect what matters to the community across the project life cycle.
 - a. Prioritise **trust** and ensure **transparency**.
 - b. Engage meaningfully.
 - c. Help impacted communities realise value.
- 2. Proactively identify, mitigate and manage impacts (e.g., native forest, endangered habitats, areas of cultural significance and other community impacts
- 3. Promote new ways of working and continued improvement to ensure greater efficiency and effectiveness, including collaboration across Government, Government-owned utilities and private industry.
- 4. Promote shared infrastructure.
- 5. Enhance existing network before investing in new build.

PoweringWA Activities

Summary

- Establishing PoweringWA 1 July, SWIS focus
 - Recruiting a team, developing strategic plan
- Building relationships with key stakeholders
- Finalising our engagement strategy
- Commenced the development frameworks for community benefits and landholder compensation
 - Discussion paper to be released soon
- Working with Western Power on transmission requirements

Community engagement and shared benefits

Early engagements will help inform strategies and policies

The information gathered from the initial engagements will be used to inform long-term strategies and policies, with a focus on communication, engagement, landowner compensation, community benefits and opportunities for Traditional Owners.

PoweringWA Social Licence & Community Engagement Strategy						
PoweringWA Initial Engagements						
PoweringWA Comms Strategy	State Landowner Compensation Policy	State Community Benefits Scheme	PoweringWA Traditional Owner Opportunities Policies	Western Power Consultation (project level)		
PoweringWA Comms & Media Plan	PoweringWA Updated Community/TO Engagement Plan	Western Power Engagement, Communication and Community Benefits Plans (at project level)				

Priority engagements – Share, listen and learn

Inform, consult, involve staggered approach aims to provide stakeholders time to reflect on information (and supporting resources provided) before consultation sessions.

Feb	Mar	Apr	May	Jun			
WALGA							
Local Governments							
Regional Development Commissions and other State Government Agencies working with regional communities							
Traditional Owners							
Industry							
Community							
Landholders							

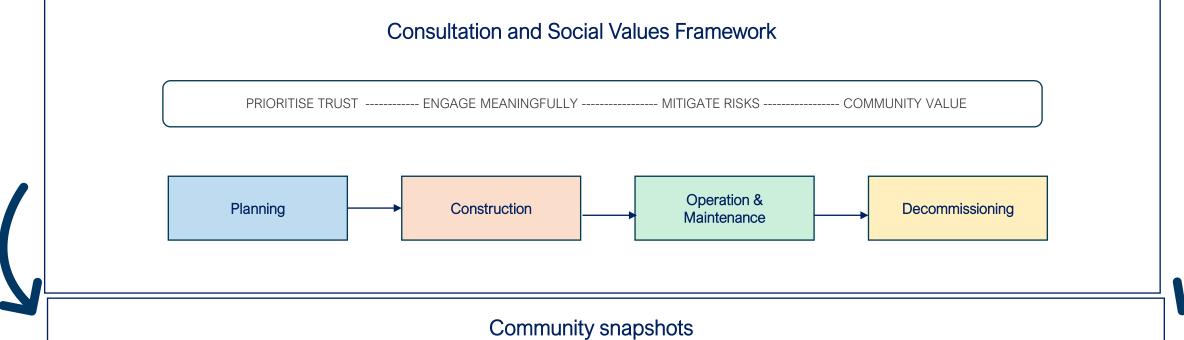

Key Themes Emerging from Initial Conversations

- There is a clear desire to secure lasting benefits for impacted communities.
- Concerns about the impact of renewable energy development physical scale of projects, community disruption and potential for community division.
- Each community is unique and different concerns. Some communities have an existing infrastructure deficit (lack of housing) that will impact on the delivery of projects.
- Communities are impacted by the development of renewable energy projects long before construction starts (and into decommissioning), but benefits are uncertain.
- Regional development opportunities will require coordination across Government, industry & Western Power.

Designing engagement tool to understand & capture unique community needs across the project lifecycle

Information for each community (from targeted consultation) with key themes around what was important for them. To be published on website. Provides transparency & to be used by Gov, industry, TNSPS to help develop relevant policies, strategies & plans.

PoweringWA is reviewing the existing landholder compensation framework & considering community benefit opportunities for impacted communities.

Discussion paper to be released & consultation sessions to be scheduled to better understand views of stakeholders, including communities, landholders and industry.

PoweringWA Support Contact

We are developing a support resource that community and landowners can reach out to for any PoweringWA* related questions.

In future, the support resource may expand to provide in-community support. In the meantime, people can reach out via:

*PoweringWA's current focus is electricity infrastructure in the South West Interconnected System (SWIS). It may expand in the future.

Other updates

Australian Energy Infrastructure Commissioner (AEIC)

- Resources for landholders on negotiating with developers
- Information on engagement with neighbours and the community
- Community Engagement Review just completed (December 2023)

Next Steps

Next Steps

- 1. Local Government engagements commenced.
- 2. Community consultation sessions to be scheduled soon.
- 3. Meeting with landholders and communities to better understand needs.
- 4. Develop a landholder compensation and community benefits discussion paper.
- 5. Finalise reference groups. Watch this space. We will have more information on the groups and will provide pathway to join in the next briefing session.
- 6. Further development of the PoweringWA Support resource.
- 7. New PoweringWA website underway, which will provide visibility on progress, strategies, policies, etc.

PoweringWAsupport@dmirs.wa.gov.au www.wa.gov.au/poweringwa Thank you for joining – Questions?
