Good Morning,

We live in a village with an embedded network. The Village is also a small caravan park,

We now pay \$11.50 per month, or \$1207.5 per month. Supply charge to management.

There are 105 houses in this village, management has now decided to charge us the supply charge of 1.04 per day.

This would amount to a total of \$109 per day or \$3276 per month (30days) for 105 houses. Do management pay this amount to Synergy or

Do they only pay a percentage and keep the rest as profit.

We pay our electricity usage once a month to Management.

90% of the residents are old age pensioners and the increase in the Supply charge would be detrimental to their living costs.

We have Solar panels on our house as do some of the other residents .

What we would like to know is, how much the Village management have to pay for supply charge for the whole village, or do they

Pay a set rate as being the first house/office on the site.

Hoping you can understand the above

Sincerely
