

RC_2014_06: Removal of Resource Plans & Dispatchable Loads

**MAC Meeting
13 December 2017**

Content

- Background
- Issues for discussion
- Next Steps

Background

History

- Proposal and Notice first published in January 2015
- 3 Submissions received
- In March 2015 all Rule Change Proposals “on ice”

2017 (now)

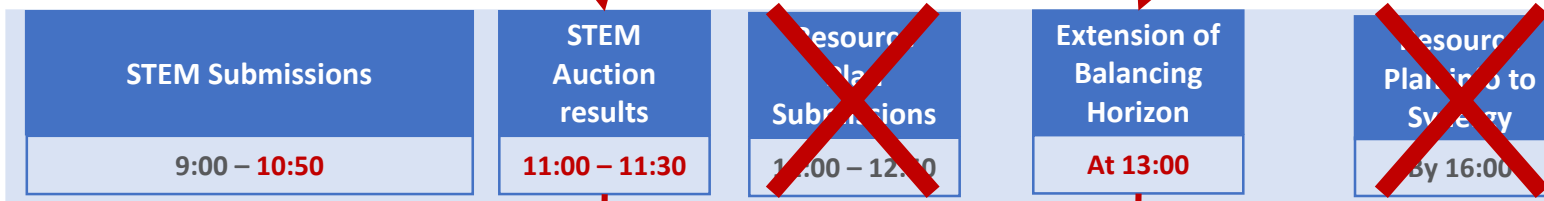

- Significant changes to Market Rules since January 2015
 - AEMO and RCP Support have assessed impact on proposal
- New questions for proposed changes

Alternative Scheduling Day Timeline*

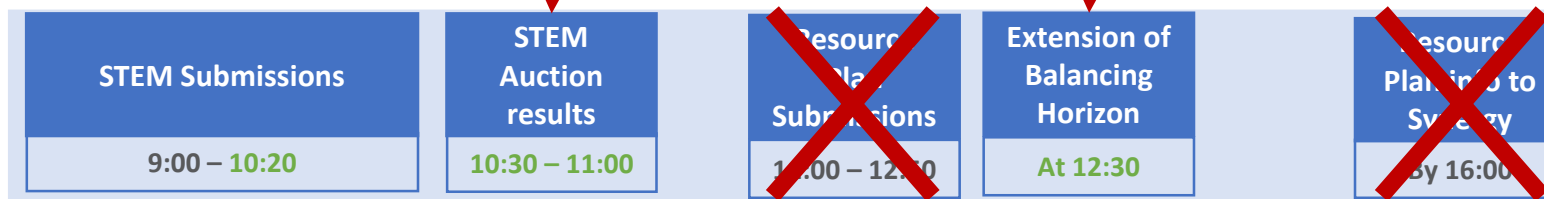

Timeline current Market Rules

Timeline proposed in RC_2014_06

Alternative timeline

* Selected events

STEM Delay - Issues

7 January 2017 occurrence

- AEMO discovered error in Ancillary Service information (after opening STEM Submission window)
 - 2 participants unable to make STEM submission
 - AEMO extended STEM Submission window
 - AEMO rectified Ancillary Service information

Issues

- Gazettes removed option to delay STEM for problems with Ancillary Service information
- AEMO not allowed to repeat any scheduling steps (e.g. if wrong information is published)

STEM Delay – Request for Feedback

Questions

- Should the provision for AEMO to delay the STEM because of issues with the Ancillary Service data be reinstated?
- In case of any issues with the Scheduling Day steps:
 - Should AEMO be allowed to:
 - repeat relevant Scheduling Day steps to rectify any issues; and
 - delay timelines for such rectification?
 - Should any restrictions or conditions be placed on such repetition and the associated delay?

System Management Function Transfer to AEMO

Issue

- The rules use different terms to refer to System Management:
 - System Management
 - AEMO in its capacity as System Management
 - AEMO

Question

- Are there any reasons to not replace all references to 'System Management' with references to 'AEMO'?

Next Steps

- Feedback from MAC by Wednesday 20 December 2017
- Publication of call for further submissions by end of January 2018
- 2 week submission period
- Publication of Draft Rule Change Report in March/April 2018
