

Government of Western Australia  
Energy Policy WA

# Governance of the Western Australian Energy Sector

Presentation for the **Market Advisory  
Committee**

Kate Ryan  
Energy Policy WA  
20 October 2020

# Taking charge of **our energy future** beyond the Energy Transformation Taskforce

Transferring and allocating functions to the Coordinator of Energy

## Administration of rules

WEM Rules and Gas Services Information Rules from the Rule Change Panel, and the new rules for the North West Interconnected System

## Market development functions

Including some policy or technical reviews from the ERA and exploring other opportunities to rationalise the reviews under the market rules

## Future Whole of System Plans

Development of future Whole of System Plans with support from Western Power and AEMO

# Rationale

## Government leadership

Energy transformation continues beyond the life of the Energy Transformation Taskforce

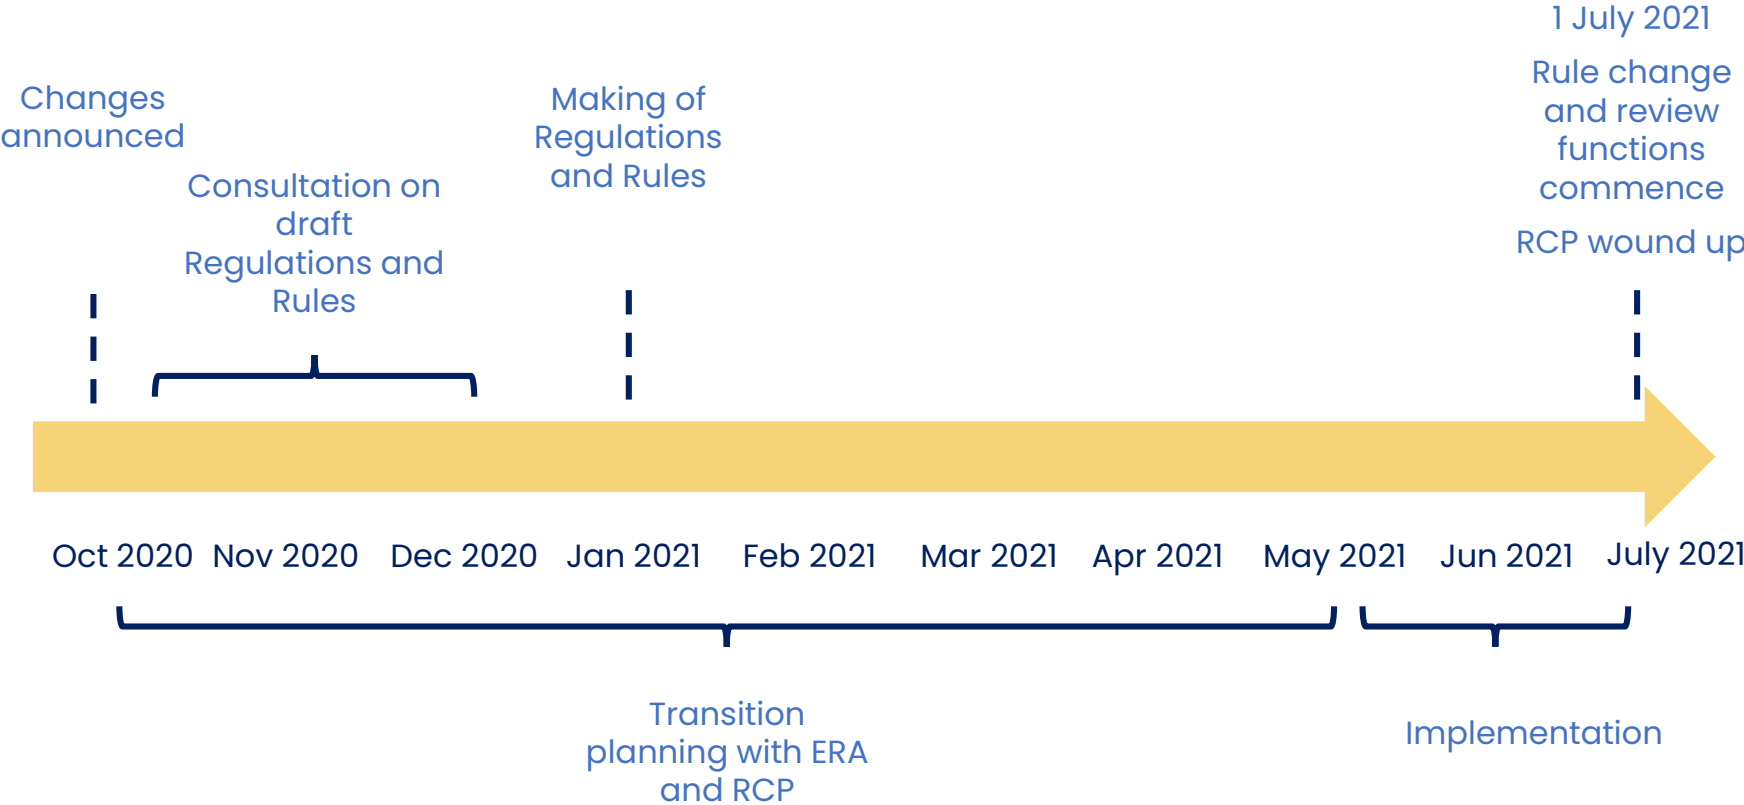

Government has a role to play in continuing to lead WA's energy transformation

## Efficiency & effectiveness

Address gaps and reduce overlaps in current governance arrangements

In particular, allocate the responsibility for policy, coordination and market development to a single governance body

# Next steps

# Thank you
