

Process AND content!

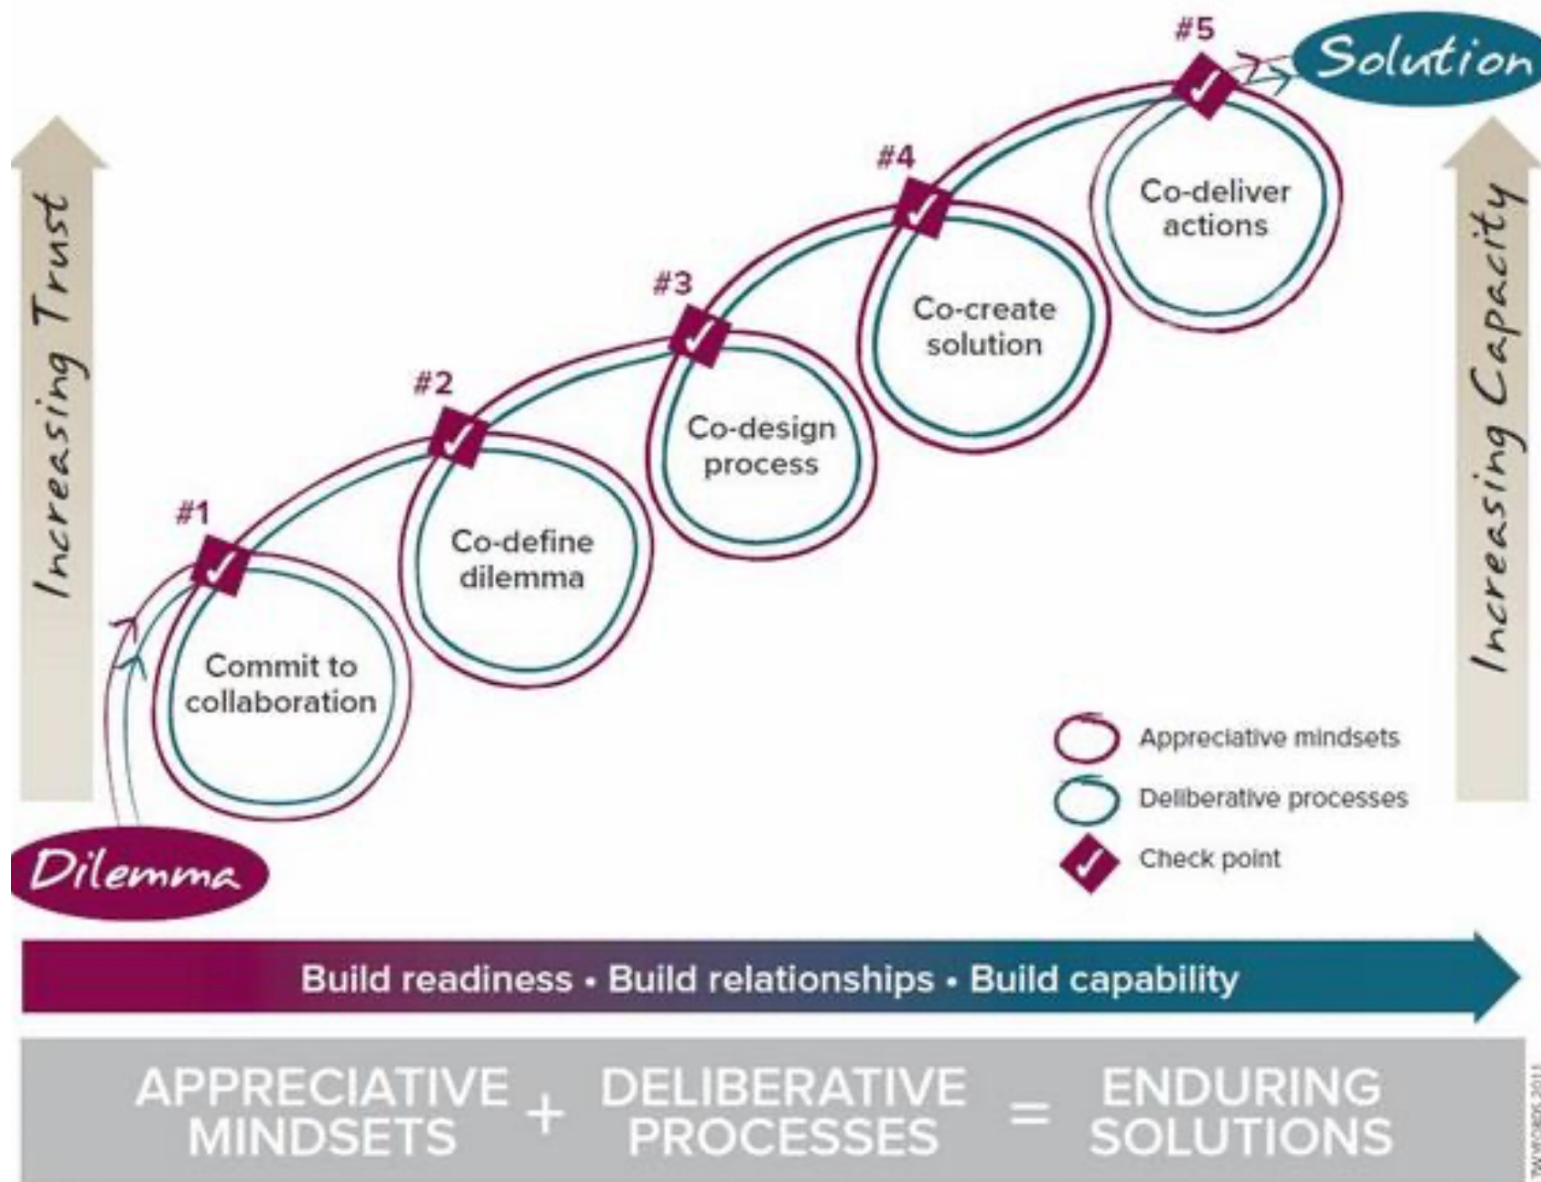

Who?

What?

Collaborative Governance

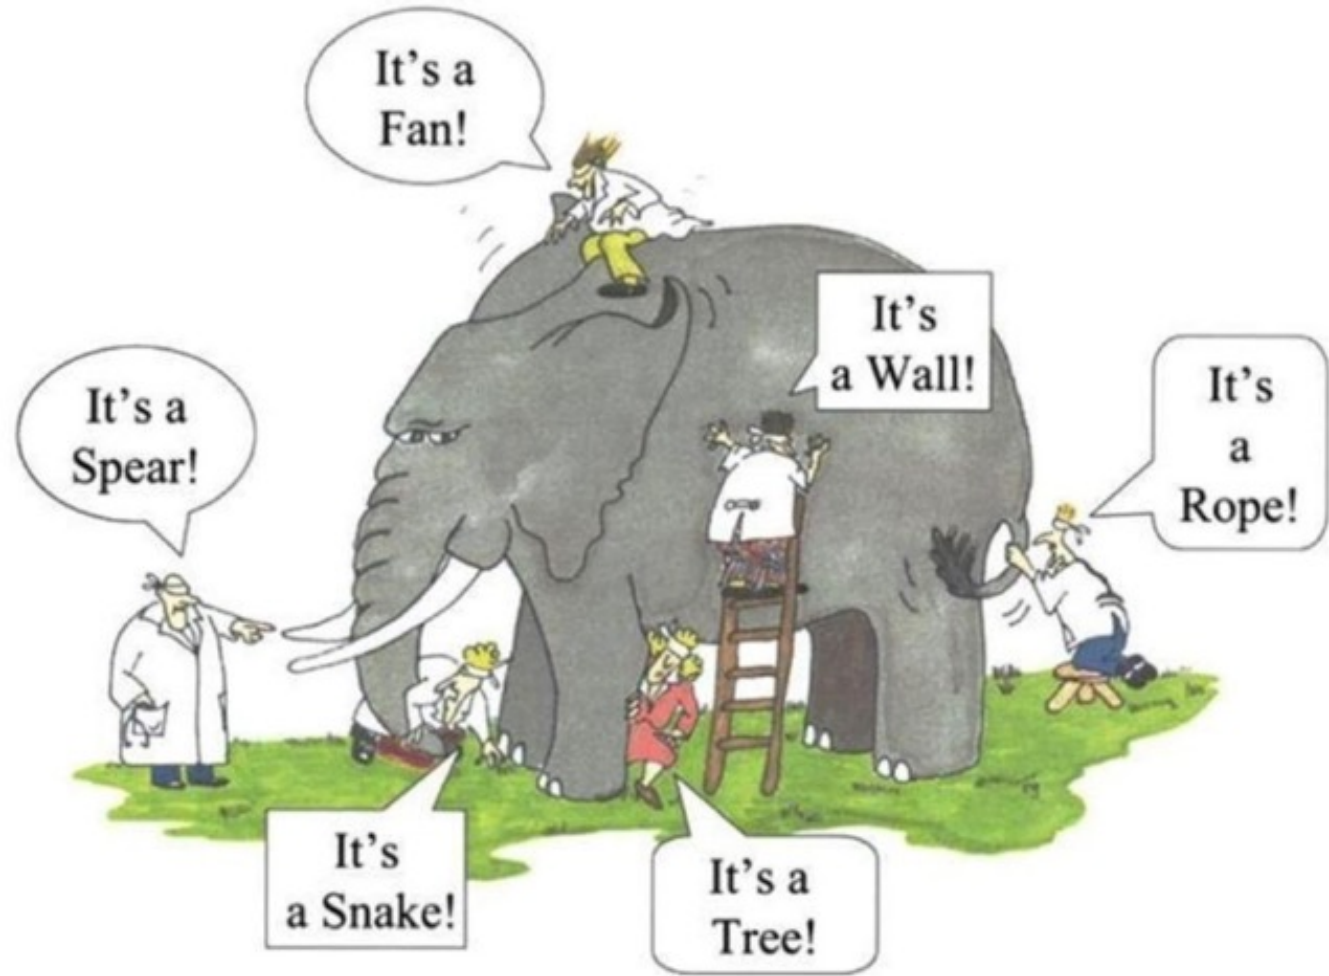

Why?

My understanding of the why

Different perspectives ...
scapegoating and
power plays

A story about “the
Perth people”

To optimise the performance of the entire system, stakeholders need to shift from trying to optimise their element of the system to improving relationships among its constituent elements. They need to shift towards *thinking systemically*.

How?

A human problem, not a technical one

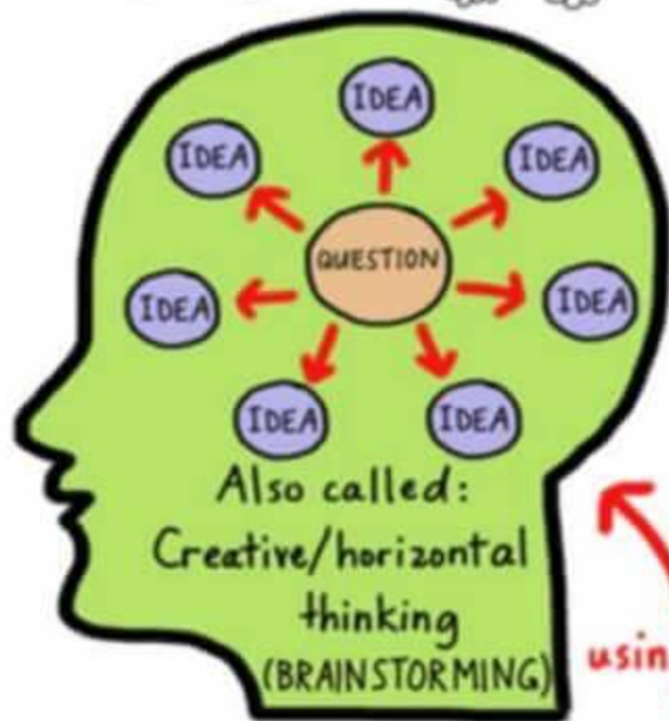

Moving beyond BAU

Diverging and converging

Modes of Thinking

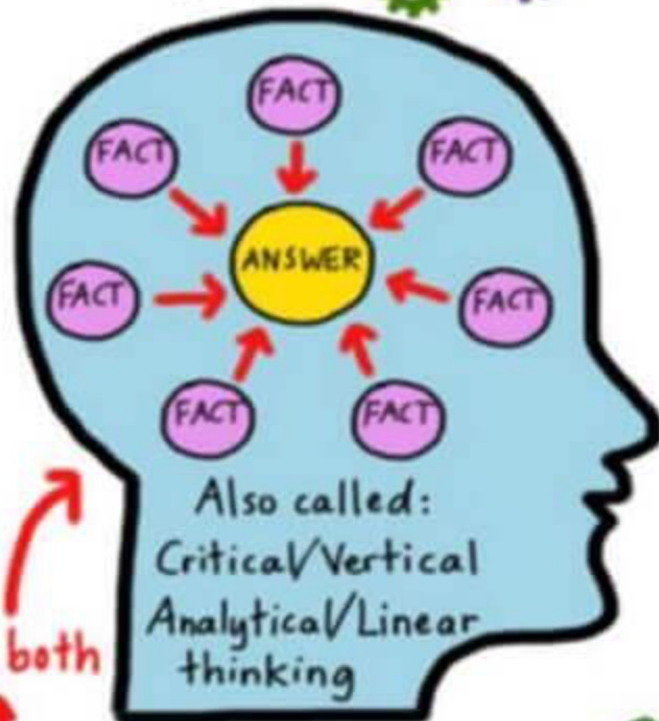

Divergent Thinking

Using imagination 

Convergent Thinking

Using logic 

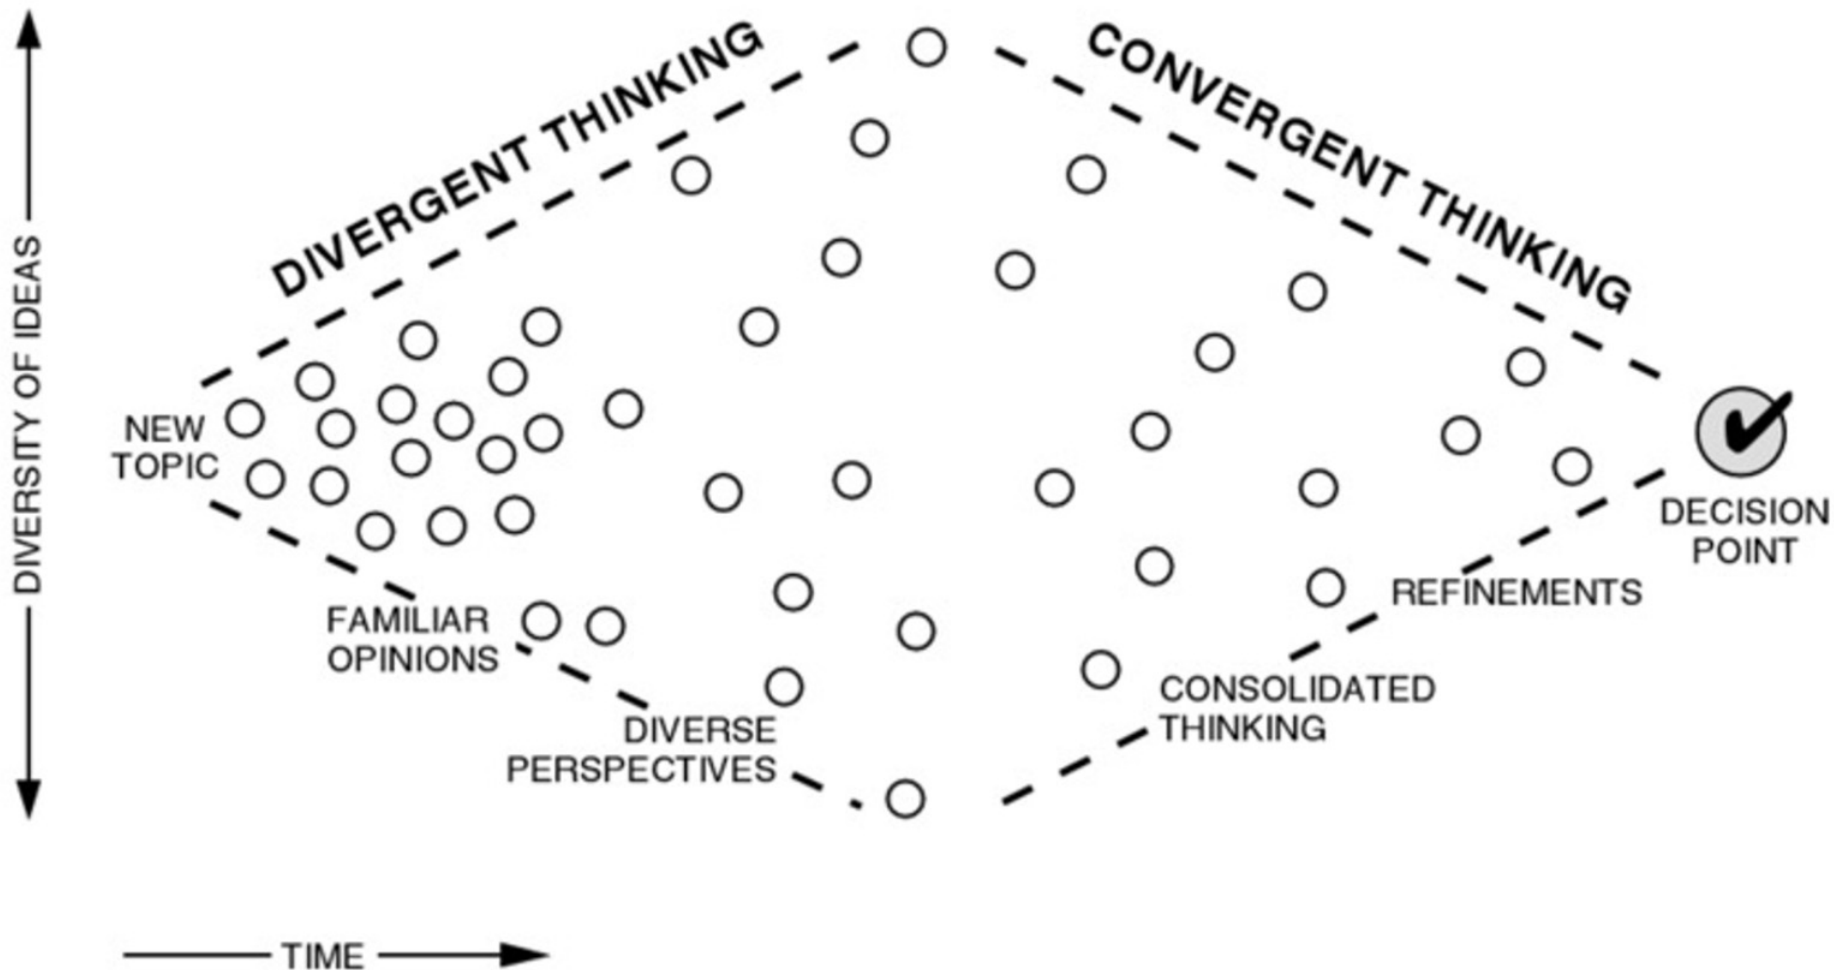

using both

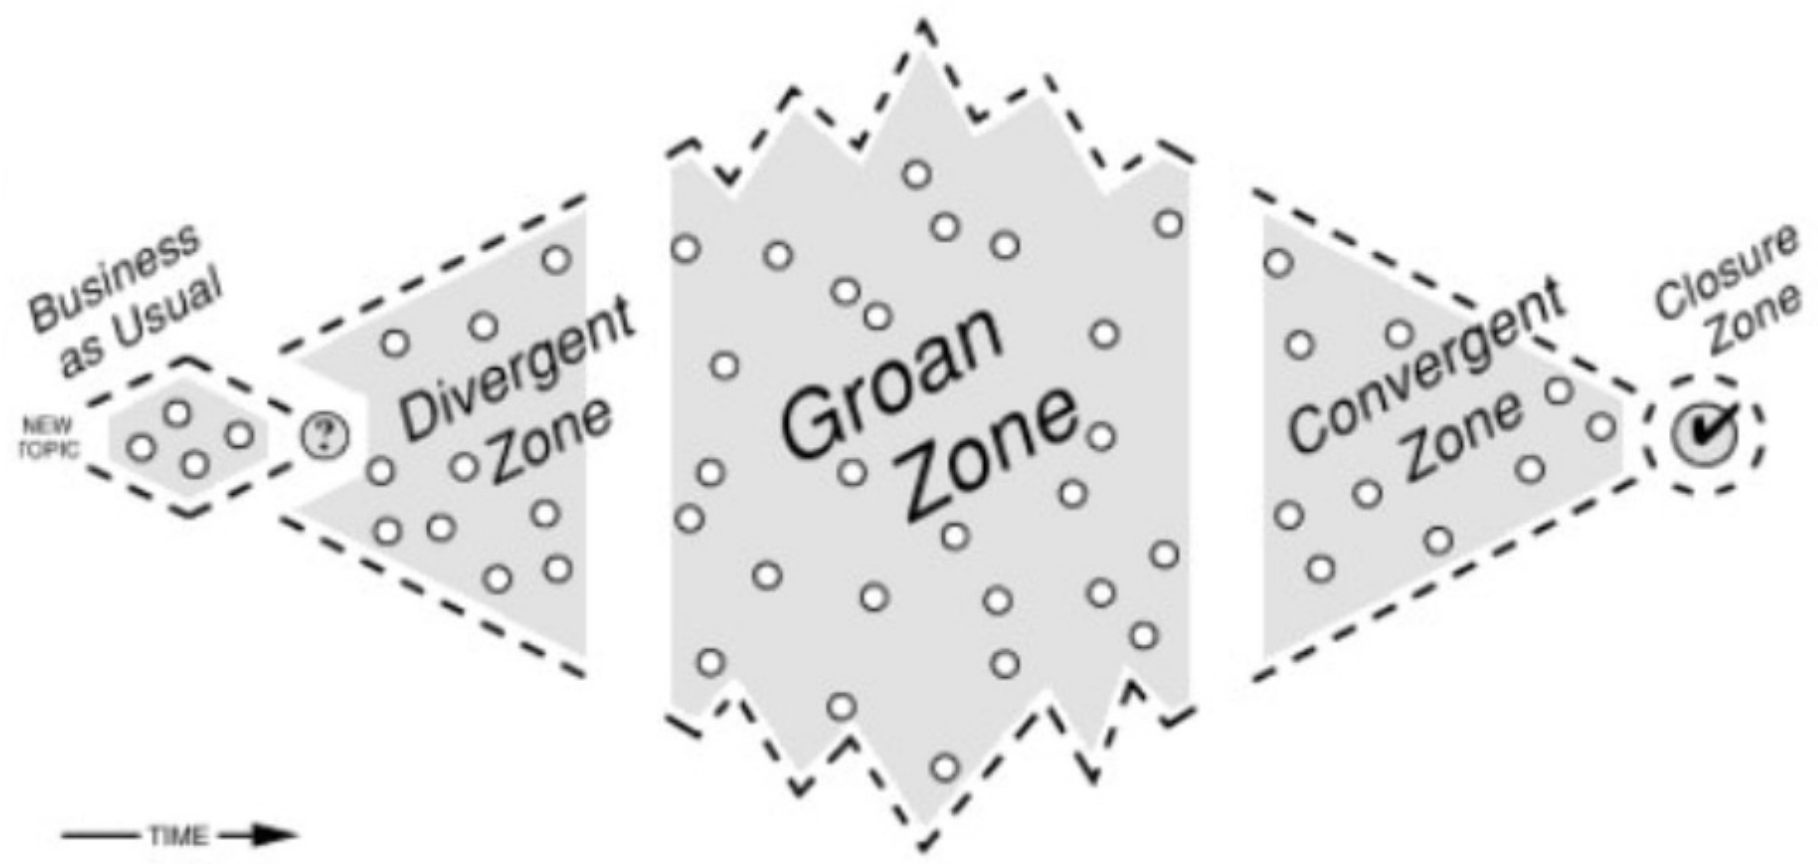

Lateral Thinking: Thinking "Outside the box" 

@sylviaaducKworth

SAM KANER – Diamond of Participation

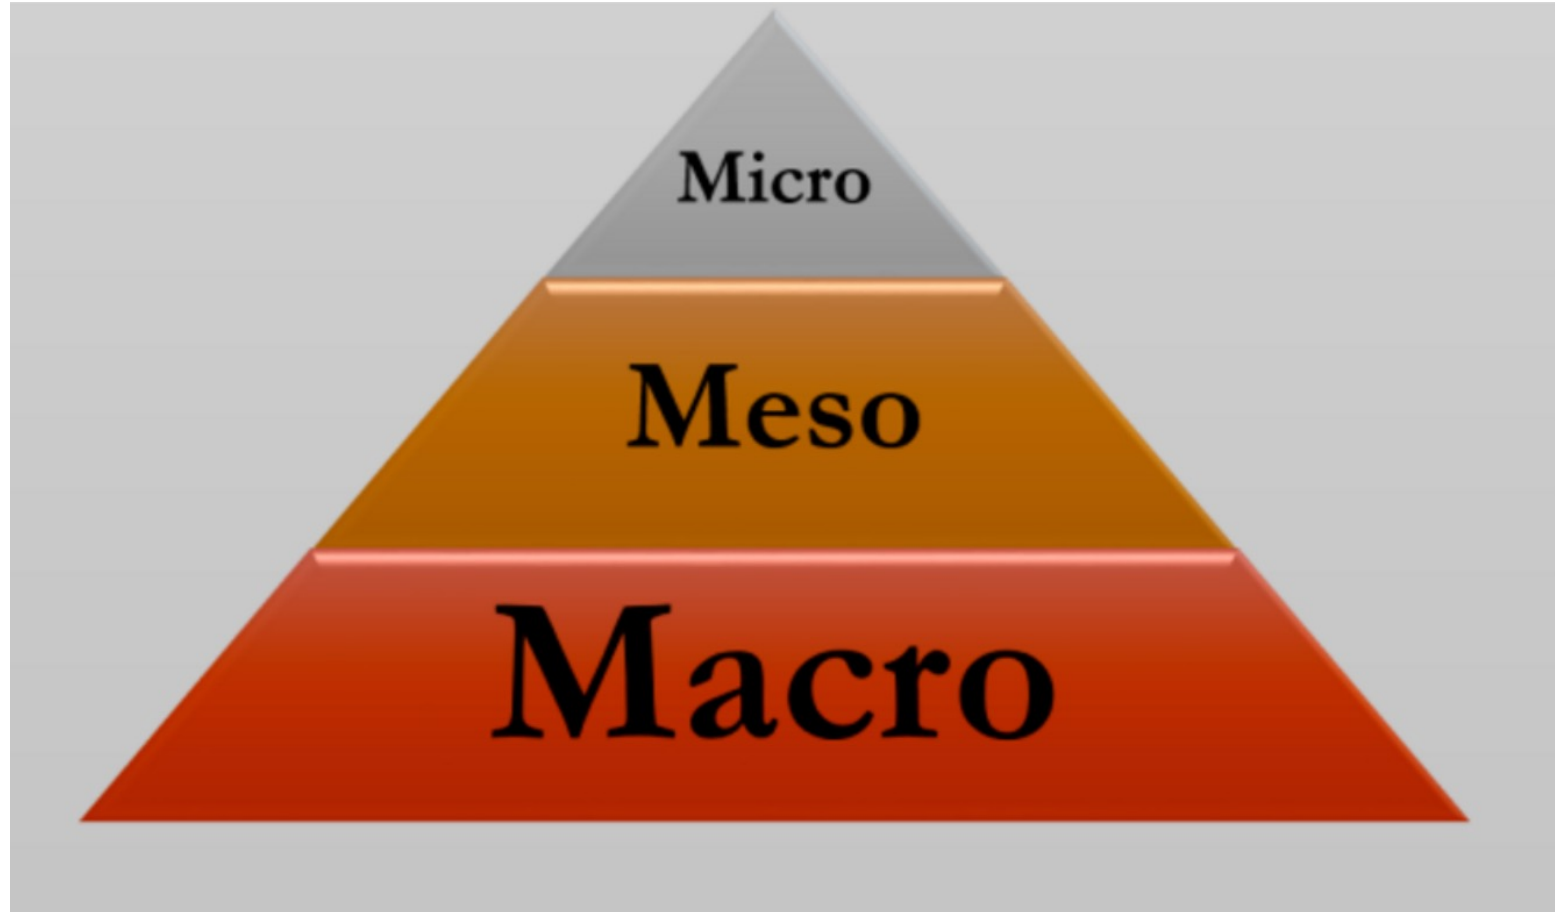

(Dynamics of Group Decision Making)

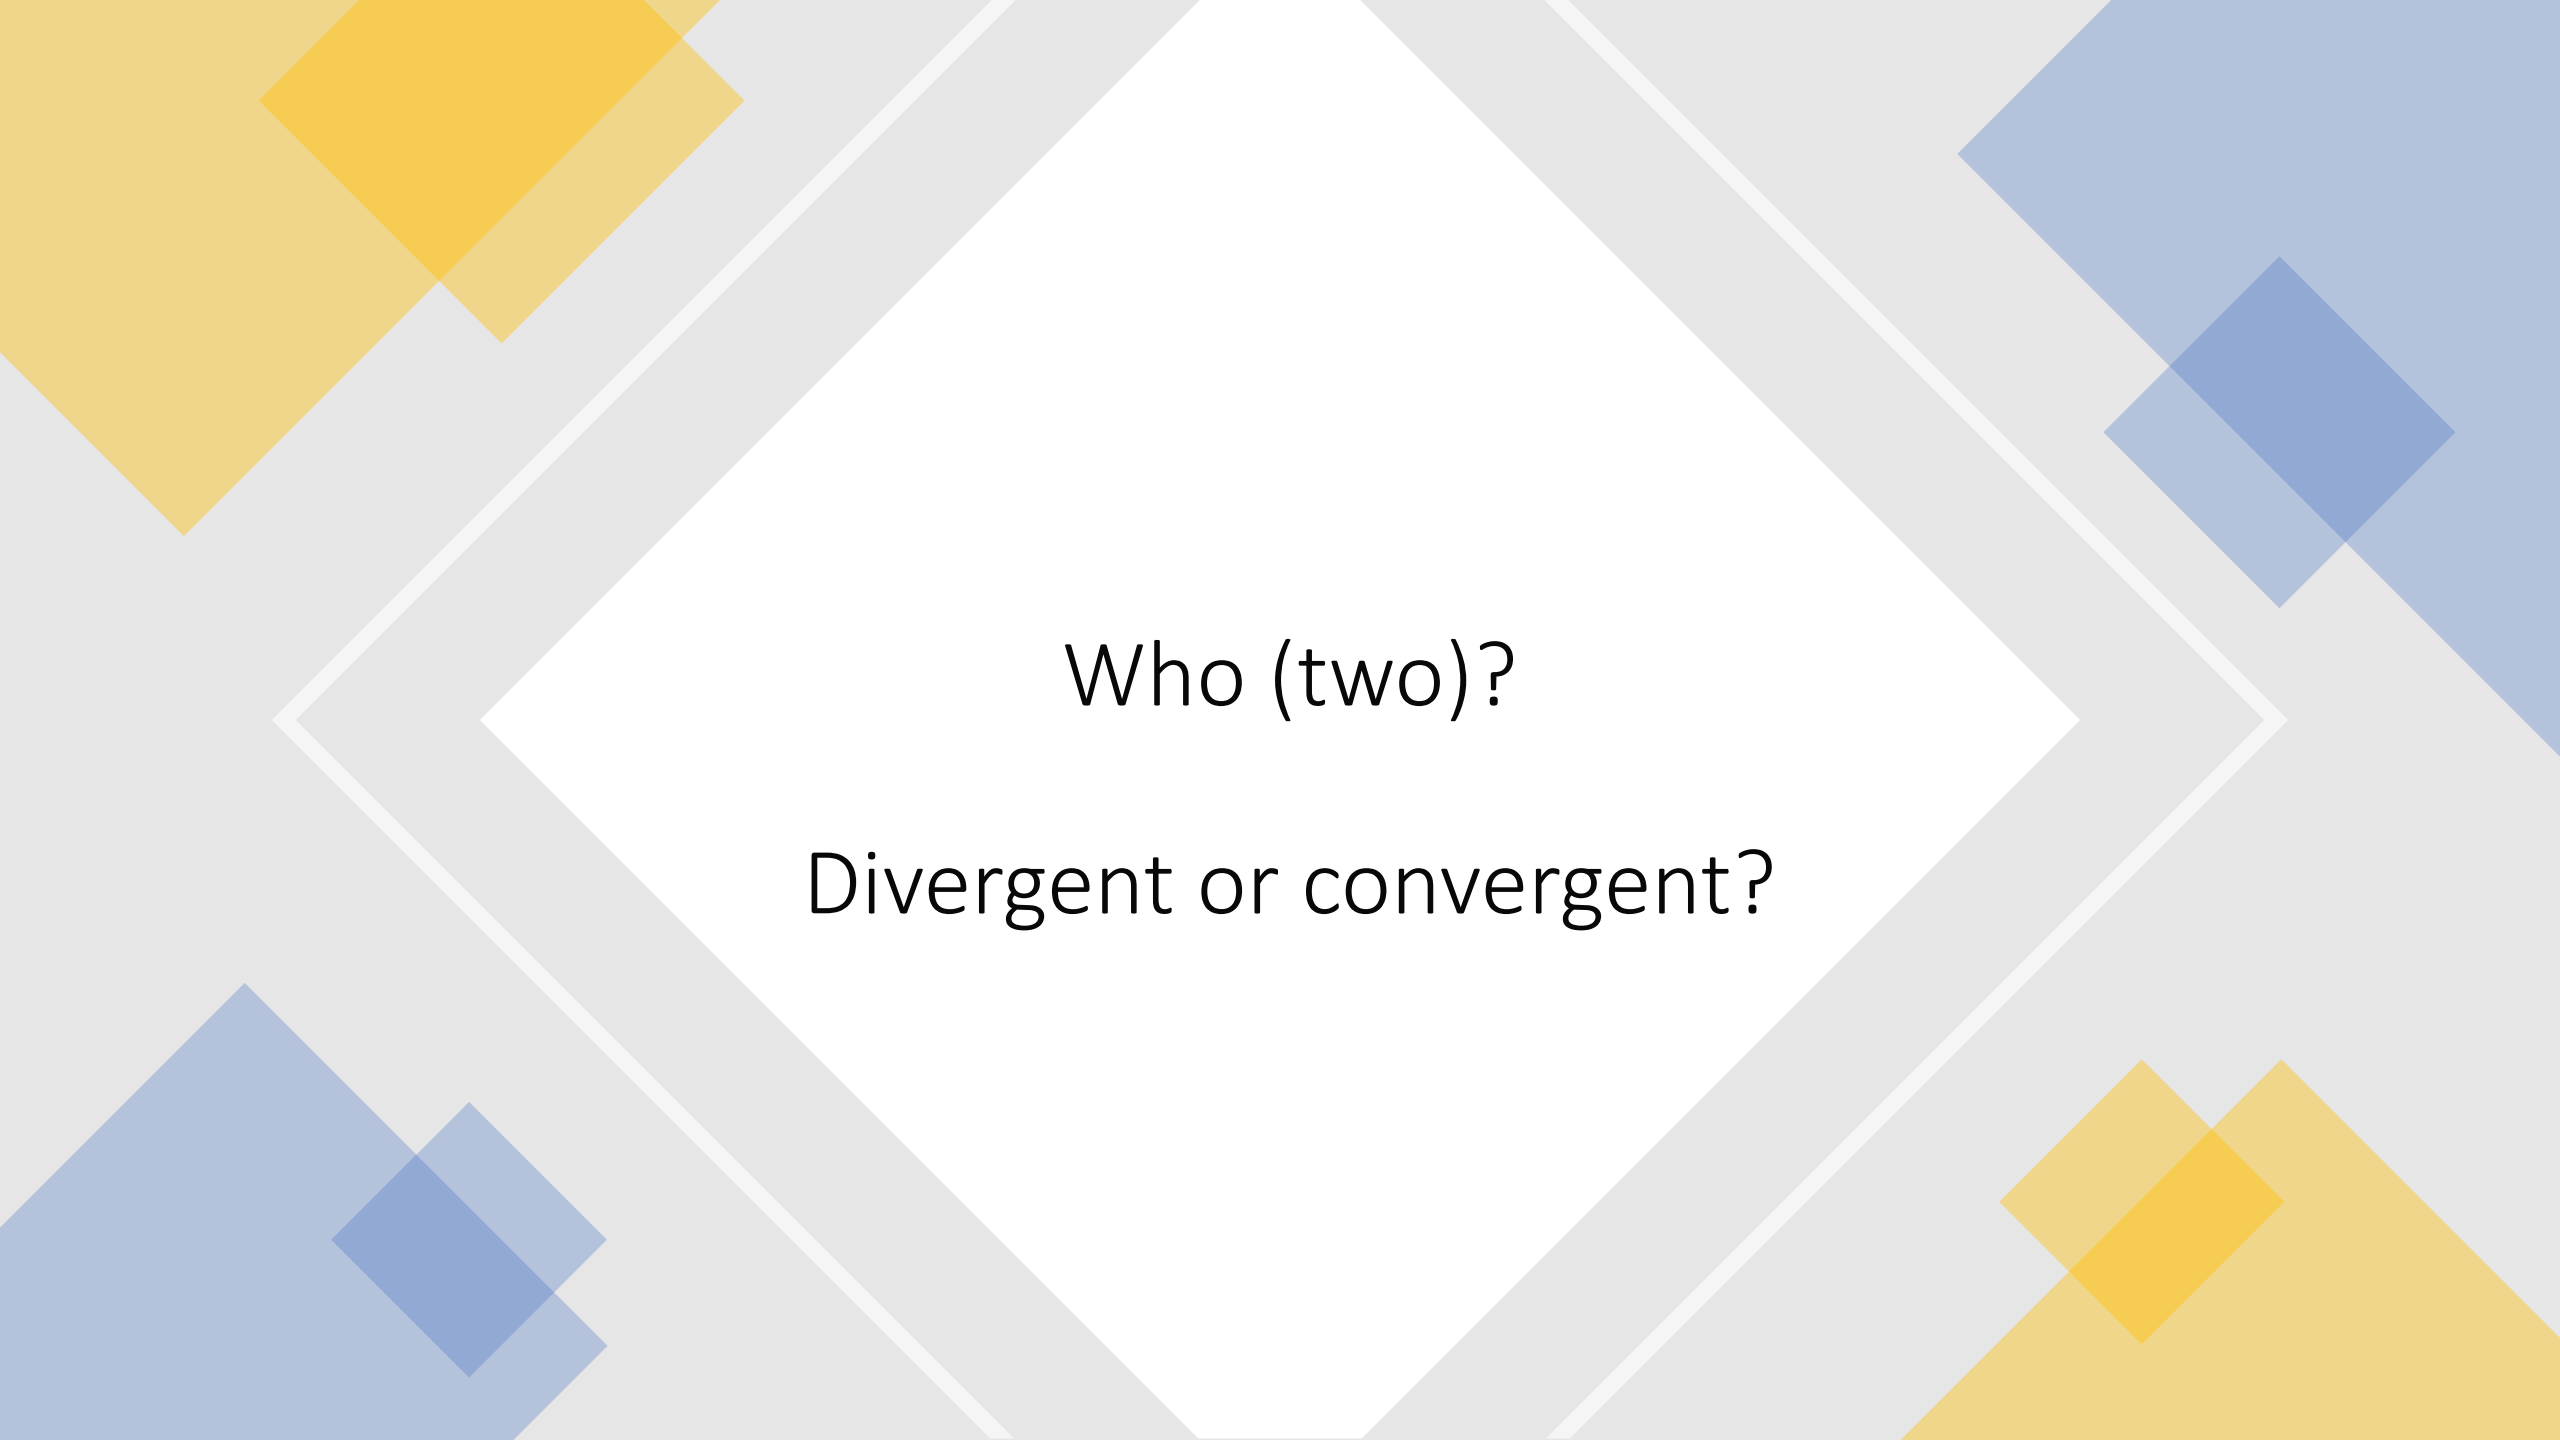

Things are often more complex than our brains would like them to be ... ignore that at your peril. A story re carbon

Who (two)?

Divergent or convergent?
