

COMPANY OVERVIEW

Chironix is an Applied Robotics Solutions Developer, with a specialisation in field robotics. Our focus is on the Defence Industry and the Resources Industry, both of whom we know to be safety conscious and are seeking system level efficiencies. Our Research & Development practices, combined with our Software Development and Systems Integration experience, put us in a position to service Defence Science and the Defence Industry.

Our history with the Departments of Defence for Australia and the United States has positioned us to be a capable Research & Development arm for Defence Science organisations. Our provision of goods and services to Tier One Resources companies has kept us in touch with the needs of the Defence Industry. Our value proposition is in our ability to service those who service Defence.

CAPABILITIES

- ▶ Software development in Applied and Field Robotics
- ▶ Systems design and integration in Applied and Field Robotics
- ▶ Remote controlled, mobile thermal inspection solutions
- ▶ Autonomous and mission managed payload delivery solutions
- ▶ Distribution rights for land robotic platforms
