

Energy Policy Strategic Deliverables

Towards 2029

The **Energy Policy Group** focuses on policy and provides advice to government to facilitate the delivery of secure, reliable, sustainable and affordable energy services to Western Australians. The Group supports the Coordinator of Energy to discharge statutory responsibilities in the management of fuel, gas, and electricity supply disruptions and leads DEMIRS whole-of-government regulatory reform activities.

Deputy Director General: Jai Thomas

Our priorities:

-  Sustain responsible industries
-  Protect the community
-  Drive energy transition

Our approach:

-  Empower people
-  Advance effective regulation
-  Cultivate trust and collaboration
-  Lead through change

Strategic deliverable	12 month focus (2024–25)	Measure/s of success (Towards 2029)
<p>Powering WA¹</p> <p>Timeframe: up to 10 years</p> 	<ol style="list-style-type: none"> Secure resources and establish role in the broader government landscape. Develop guides, compensation / benefits arrangement and community support mechanism. 	<ol style="list-style-type: none"> Establish communication and ongoing stakeholder feedback engagement with industry and communities. Energy diversification benefits are realised by consumers.
<p>Progress priority policy reforms</p> <ul style="list-style-type: none"> Energy Transformation Strategy (ETS)¹ Wholesale Electricity Market (WEM) Distributed Energy Resources (DER) Pilbara Energy Transition Plan (PETP) Social Housing Energy Performance Initiative (SHEPI) <p>Timeframe: 1 to 5 years</p> 	<ol style="list-style-type: none"> Review and refresh strategy for future stages. Continue reviews of WEM and adjustment of rules to ensure outcomes of previous reviews are enacted. Transition into planning for regulation and market rule amendment to implement Roadmap actions. Detailed design and initial implementation actions for PETP. State and Commonwealth endorsement of SHEPI Funding Agreement and delivery of Stage 1 energy upgrades. 	<ol style="list-style-type: none"> ETS future stages approved and initiated. Power system security and reliability standard is approved. Detailed policy positions on DER participation consulted on to inform regulation-making. New DER connections processes implemented. Implemented legal, commercial and regulatory framework to support Pilbara energy transition. Allocation of Rewiring the Nation funds to priority transmission projects in the Pilbara.
