INTRODUCTION

In order to initiate payment against *Contracted Programs of Study* issued through the Apprenticeship/Traineeship (Employment based) and Institutional based programs, *Registered Training Organisations* (RTOs) are required to report electronically validated data to the Department of Training and Workforce Development (Department). The *Training Allocation Management System (TAMS)* has been developed to manage the electronic reporting process.

The primary functions of TAMS are to:

- manage RTO contracts with the Department;
- provide an on-line interface by which RTOs can submit student enrolment data
- validate all enrolment data submitted; and
- Calculate and record payments.

Enrolment and *Student* information is submitted to TAMS via TAMS RTO Portal, an on-line application that provides RTOs access to their registration and curriculum information, apprenticeship and traineeship details, and contractual, reporting and payment information. Through TAMS RTO Portal, the *Enrolment* and *Student* data files are validated to ensure they contain all required data elements and the data reported is consistent with the Department's business rules; the file structures and associated business rules are outlined in this document.

The most recent version of this document – *Text File Specification for TAMS Electronic Reporting Version 1.4* - is made available via the Jobs and Skills WA website, under Policy, fees, payments and pricing ([Jobs & Skills WA: Management of the training contract \(www.wa.gov.au\)](http://www.wa.gov.au)) and should be read in conjunction with the *guide 'Manual for Payments and Reporting for Publicly Funded Registered Training Organisations'* available via the above link titled Jobs & Skills WA contracted providers: Payments and reporting (TAMS) guide .

SUMMARY OF VERSION CHANGES

Text File Specifications 1.4

1. Added new residency status codes.

ENROLMENT TEXT FILE

ENROLMENT TEXT FILE

DESCRIPTION

The *Enrolment* text file must contain a record for each *Unit of Competency* or *Module* enrolment for every *Student* associated with all active Contracted Programs of Study.

Each individual enrolment record provides information about the status of training activity at the time of lodgement:

- The *Contracted Program of Study (CPS)* under which the enrolment is made (CPS details can be viewed on TAMS RTO Portal under My Contracts as outlined in the Business Rules, Funding Schedules).
- The *Unit of Competency* or *Module* undertaken, or likely to be undertaken, according to the student's Training Plan or Course outline. Enrolments should include those that have been completed (whether successfully completed or not), those still in progress and those yet to start. Each record details the start and end date of the training delivery (actual or anticipated date), where and how the training is/will be delivered and the outcome of the training.
- The *Student* undertaking the training. For Traineeship and Apprenticeship programs, student details must align to those registered on the *West Australian Apprenticeship Management System (WAAMS)*; for all other programs, student details must align to those registered on *TAMS Student*.
- The status of the *Training Program* as a whole; has the student been issued with a certificate/statement of attainment for the successful completion of a program of study (all the requirements for the completion of the Qualification, Course or Skill set, including on-the-job requirements have been met).

FORMAT

- Fields are tab delimited.
- Standard end of line (ASCII 13/10) at the end of each record.
- Field headings should *not* be included in the first line of the file.

IMPORT LOCATION

When importing a text file using the TAMS RTO Portal the user is prompted - with the standard browse dialog box - to locate the folder where the text file is stored.

CONTRACTED PROGRAM OF STUDY

DESCRIPTION

To deliver a program of training a *Contracted Program of Study* (CPS) identifies a contractual arrangement between a Training Organisation and the Department. The training contract specifies the *Qualification, Course or Skill Set* to be delivered, the region or location in which the training will be delivered, the number of contracted places (where applicable) and the payment rates applicable to each contract (per place, per hour and/or per contract).

The *CPS* is linked to various funded programs managed by Training Resource Allocation. The programs fall under two main program types; User Choice represents employment-based programs such as Apprenticeship and Traineeships; and Non User Choice represented by institutional type training that is **not** employment-based.

FORMAT

- 8 digit numeric formatted as *yyyynnnn* where:
 - All programs of study are allocated an eight-digit numeric identifier: the first four digits represent the contract year; the remaining four digits are allocated as contracts are created.

BUSINESS RULES

DESCRIPTION

Unit of Competency or Module Hours are assigned to each *Unit of Competency or Module* within a structured program of study; they represent the anticipated hours of supervised learning and/or training deemed necessary to conduct training, learning and assessment activities associated with that *Unit of Competency or Module*.

Unit of Competency or Module Hours do not include any pre-requisites for the *Unit of Competency or Module* that have previously been achieved. Hours are allocated assuming a traditional classroom-based delivery and assessment strategy and do not include hours associated with non-supervised work experience, field work, work placement or private study.

- *Unit of Competency / Module Name* may be used in several training packages and may have more than one *Unit of Competency / Module Code*. For data management purposes, Training Organisations must retain the *Unit of Competency/Module Name* associated with each *version* of the Unit of Competency or Module and report activity under the appropriate version.

TAMS ERRORS

TAMS WARNINGS

UOCNAM-2 *UoC/Module Name* does not match the *UoC/Module Name* for the corresponding *UoC/Module Code* as listed on TAMS.

STUDENT TEXT FILE

TAMS STUDENT

DESCRIPTION

TAMS Student holds information relating to *Students* who are enrolled in Programs where the student is not registered on *WAAMS* - such as *PIT, Participation Equity, Pre-Apprenticeships etc.*

When reporting enrolments for a non-User Choice Program in the *Enrolment Text File*, only the *Provider Student Id* can be recorded for students (see the business rules for the *Enrolment Text File*). Even if a student may have a *WAAMS* Number through a prior training program, only their *Provider Student Id* is reported for their non-User Choice enrolments. This means that there is no corresponding record in the *West Australian Apprenticeship Management System (WAAMS)* from which *TAMS* can source information about the student. Therefore, a record for each non-*WAAMS* Student must exist in *TAMS Student*.

A *Student Text File* does not need to be submitted each time a training organisation submits a lodgement for a CPS. As long as each *Student* reported in the *Enrolment Text File* has a record in *TAMS Student* - either through submission of a *Student Text File* as part of an earlier lodgement, or through direct entry onto *TAMS Student* – the enrolment records for that student will be accepted (although still subject to verification as per all *Enrolment Text File* business rules).

TAMS Student holds only one record per *Student* per training organisation, regardless of the number of *Contracted Programs of Study* they may have enrolments in.

TRAINEES AND APPRENTICES

All *Trainees* and *Apprentices* are registered on the *West Australian Apprenticeship Management System (WAAMS)*; it is from *WAAMS* that *TAMS* retrieves all the information it needs to know about a *Student*, such as their *Date of Birth, Address* and *Demographic* details (ethnicity, educational history, etc.), as well as details about the *Traineeship* or *Apprenticeship* program as a whole, such as the *Commencement Date* and the *Status* of the complete training program.

A *Student Text File*, therefore, does **not** need to be submitted for *Students* enrolled in *Apprenticeship* or *Traineeship* *Contracted Programs of Study*.

NON USER CHOICE STUDENTS

Students enrolled in *Contracted Programs of Study* for *non* User Choice Programs must have a corresponding record in *TAMS Student*.

There are two ways in which students can be registered on *TAMS Student*:

- By *file up-load*; submitting a *Student Text File* containing all the fields necessary for a valid record to be held on *TAMS Student*.
- By direct entry into *TAMS Student*, via the on-line student screen in *TAMS*.
